

ELECTRICAL ENGINEERS / PROJECT MANAGERS

(File Reference: ELEC-2012)

On behalf of our Client, an international Consulting Engineering firm, we are pleased to be conducting a search for the following Professionals, based out of their Toronto offices:

Electrical Engineers and Project Managers

You will contribute your expertise as part of a Team specializing in project management and engineering in mining, infrastructure, mineral process plant design, resource/reserve estimation, feasibility studies, multi-technical services and construction activities.

Key Accountabilities:

- Assume a Lead role in Electrical Engineering, on different projects.
- Perform and supervise preparation of cost estimates, project planning, scheduling and cost control functions.
- Produce electrical engineering classifications and facility designs including area classifications, single line diagrams, power system analysis, power distribution layouts, lighting designs, motor schematics, instrumentation wiring layouts, electrical heat tracing and grounding layouts.
- Assist in the coordination of the Electrical Design Team's activities in order to meet scheduled timeframes and Clients expectations
- Authorize electrical data sheets, technical specifications and technical bid evaluations.
- Participate in design reviews with other disciplines to review technical issues and provide input into constructability and operability.
- Initiate and execute Electrical power systems calculations and studies
- Prepare all documentation related to detailed equipment specifications, contract of procurement of major electrical equipment and construction document packages
- Coordinate startup, commissioning and maintenance activities
- Visit project sites/other design offices as required for project related activities

Experience & Requirements:

- You must have a Bachelors Degree in Electrical Engineering with at least 3 years within a design and project environment.
- Superior knowledge of applicable Canadian and international codes/standards governing electrical design, equipment and construction
- Strong communication and interpersonal skills
- Ability to supervise and lead a group of junior designers and engineers
- Registration as a P.Eng. – Ontario would be an asset

Total compensation for this role includes a competitive salary, performance bonus, and group benefit program.

For further consideration, highly qualified Candidates are invited to submit their resume information in confidence to (please quote the File Reference number above):
